

IEEE VIZSEC — SPONSORSHIP OPPORTUNITIES

The [IEEE VizSec Symposium](#) is inviting support from industry, academia, and government contributors in security and data visualization.

As a supporter, we encourage you to join us at VizSec 2016, colocated with [VIS 2016](#) this October in Baltimore. Supporters receive several new benefits this year:

- Recruitment — supporters will engage with the talented students and professionals that attend VizSec and VIS 2016, many of whom are actively seeking internships, employment, and collaboration opportunities.
- Exhibition — many levels of support include dedicated exhibition space for your organization at VIS 2016.
- Registration — most levels include one or more complimentary registrations for representatives from your organization.
- Exposure — for all support levels, your organization's logos will be prominently displayed at all conference events, on the conference web site, and in any conference materials.

Support Options

Please see the [IEEE VIS Support Prospectus](#) for support options. For more information on becoming a sponsor, reach out to [Lane Harrison](#) at lane@cs.wpi.edu.

Other Opportunities

We are open to other suggestions from supporters as well. Past attendees have offered several ideas for specific opportunities at VizSec organizations may be interested in supporting, including:

- Diversity scholarships
- Lunch, dinner, or meetups for attendees
- Coffee breaks
- Best Paper Award

VizSec Highlights

VizSec has been rapidly growing in recent years— both in attendance and in the diversity of our attendees and their work.
